

AI Workflow Audit

A 1–2 page audit of recurring academic tasks and the appropriate level of AI involvement.

Page 1 — 12 Recurring Tasks

Task	Classification	Why
Attending lectures	Just Me	Requires active participation and personal understanding.
Reviewing lecture notes	Collaborate with AI	AI can organize notes while I verify concepts.
College assignments	Collaborate with AI	AI assists with ideas while I produce and understand the final work.
DSA practice	Just Me	Independent problem solving is essential for skill development.
Learning programming languages	Collaborate with AI	AI can explain concepts while I practice independently.
DBMS projects	Collaborate with AI	AI assists with SQL/schema ideas while I implement and test.
OS projects	Collaborate with AI	AI helps explain concepts and debug while I build the project.
Debugging	Delegate to AI with Review	AI can identify possible bugs, but I test the solution.
GitHub contributions	Collaborate with AI	AI can assist with documentation/review while I control the contribution.
Technical documentation	Delegate to AI with Review	AI can summarize it, but important details need verification.
Project documentation	Delegate to AI with Review	AI can create a draft that I review and adapt.
Weekly study planning	Fully Automate	A recurring schedule can be generated from deadlines and workload.
